Summary

I am a dedicated Front-End developer with a deep passion for crafting clean and efficient code. My journey in the world of web development has been marked by a commitment to continuous learning and a drive to create meaningful digital experiences. With hands-on experience in building web applications, I have honed my skills in HTML, CSS, JavaScript, React, and responsive design. My enthusiasm for solving complex problems and staying updated with emerging technologies fuels my desire to make a positive impact in the ever-evolving field of software development.

Featured Projects

Digital Firm

For this project, I had the privilege of designing and developing a visually captivating and fully mobile-responsive website for a digital firm. Leveraging my expertise in HTML, CSS, and JavaScript, I crafted a dynamic online presence that not only reflects the firm's brand identity but also ensures seamless user experiences across all devices.

- Sleek, modern design.
- Responsive across all screens
- Interactive features with JavaScript
- Fast-loading performance.

ReelFlix Movie App

A dynamic web application that harnesses the power of React to deliver an immersive movie-watching experience. The app integrates with a movies database API, enabling users to search for their favourite films, explore detailed movie information, and discover trending movies in real-time.

- React-Powered Application
- Responsive across all screens and devices
- Movie Database Integration: Real-time movie data from an API.
- Search Functionality: Effortless movie discovery.
- Trending Movies: Instant access to the latest hits.

Hairdresser Shop

Designed and developed a mobile-responsive website for a hairdresser shop, featuring visually appealing design, interactive styling catalog, and optimised performance for enhanced user engagement. Custom JavaScript functionality was implemented to enhance user interactions.

- Mobile-responsive design
- Custom JavaScript functionality
- Interactive styling catalog
- User-friendly navigation
